

**Monthly report
Dec – 2007**

Mobile veterinary services:

Not receive car of MVU till now. The vet doctors start to collect data for MVU by the way of:

- Visit Bedouins settlements in Saint Katherine city and around areas (29 settlements).
- Make full collection of domestic animals number in Bedouins settlements.
- Registration of data in data base and analysis.

Analysis

Determine number of each kind

Animal	Camel	Sheep	Goat
Number	356	1348	2866

That indicates:

- Number of camels less than sheep and goats. Because depending on camels only in tourism and not a source for food.
- Number of sheep less than goats because it consumes more feed. The nature of area is dry and no pastures also expensive cost of feed.
-

Determine settlements depending on pastures

Nutrition	Grazing	Feeding	Both
No. of breeder depend on	49	236	125

That proves:

- Keeping away from grazing because its difficult and little pastures.
- Try to keep on traditional nutrition by grazing at morning and feeding at night.
- Depending more on feeding because civilization.
-

Determine spreading of mange

Animal	Camel	Sheep	Goat
No. infected animals	1	4	0
Cases percentage	0.28%	0.30%	0%

That indicates

- Little number of infected animals and good indicator for animal's health status. Number of infected animals increase in summer than winter.
