

## Water and soil quality unit

### Report of November, 2008

1. The center received a fax from the office of Mr. Governor of south Sinai to inform the center about the results of the last visitation of the committee sent by Mr. Governor to record and try to put an end to the current problems facing the activities of water purification station established by the center on Al Zaitona well .a copy of the fax included in the report.
2. According to the received fax from Mr. Governor office the unit sent a letter to the head of city council asking him to send the required information and data in order to send it to the ministry of health at Cairo to get a license enables the center to reopen the water purification station with the current techniques of water purification . this is to introduce a clean glass of water to the Bedouins and the local inhabitants for free. A copy of the letter is attached to the report.
3. Collection of water samples from wadi shreig in order to be chemically analyzed at Cairo to determine its availability for usage in human activity.
4. Preparation of some topographical maps of wadi shreig and another maps including the geographical location of the wells in that wadi .this comes in the unit priorities where the unit looks forward to make an atlas containing the sites of the wells of saint Katherine and the surrounding wadis , the unit aims to record the wells location as many as possible using the GPS technique in order to be available for the center and any one who is interested in water resources in saint Katherine protectorate .
5. The center managed a training program for some Swedish students accompanied by professors from Al Mnofeia university.
